

Nguyễn Hồng Nguyễn Hải

Intern

Why should you hire me?

- I can **work well in a team**, communicate clearly, and coordinate with others to complete tasks effectively.
- I **can handle pressure well** and stay focused on my responsibilities.
- I have a **solid foundation in English**, which helps me read documents and learn new technologies more easily.
- I am **proactive, responsible**, and willing to learn from feedback.
- I am eager to contribute to the company while developing my skills in the IT field.

PERSONAL INFORMATION

-  Nhailtvop@gmail.com
-  0777543918
-  facebook.com/HaiNguyenIT
-  github.com/L1m-NguyenHai
-  73 Nguyễn Tạo , Ngũ Hành Sơn , Đà Nẵng

EDUCATION

Vietnam–Korea University of Information and Communication Technology (VKU)

Major: Software Engineering

2022 – present

- GPA: 3.58/4

Academic Achievements:

- 7/9 semester scholarships for excellent academic performance.
- Consolation Prize in the Ai4Life 2025 competition
- Consolation Prize in the English Talent Competition 2023

SKILLS

Programming Languages

Python, JavaScript, Java, C++, Rust (Basic)

Frameworks / Libraries

React, Tauri, FastAPI, Playwright, PyTorch, TensorFlow

Databases

Supabase, MySql, SQLite, Firebase

Automation & Workflow Tools

n8n, LangGraph

Office & Design Tools

PowerPoint, Word , Excel ,Canva

Language Skills

Toeic 890/990 (L+R)

EXPERIENCE

July 2025 – October 2025

SkyTech Technology Development Co., Ltd.

Internship

- Learned about the software development process in a professional business environment.
- Supported requirement analysis by collecting information and clarifying necessary system features.
- Participated in task breakdown, progress tracking, and collaboration with team members.
- Gained practical experience in teamwork, task management, and delivering products based on requirements.

PERSONAL PROJECTS

Mar 2025 - Jun 2025

VKUTK – Plugin-Based Web App with n8n Integration

github.com/L1m-NguyenHai/VKUTK

- **Tech Stack:** TypeScript, Python, n8n Automation, Docker Deployment
- Developed a Tauri-based web application that interacts with n8n workflows through webhooks.
- Designed a plugin-based architecture to extend backend functionality.
- Integrated n8n webhooks to automate workflows and support flexible feature expansion.
- Designed a Cog-based plugin system with dynamic Cog loading and unloading, improving scalability and maintainability without requiring an application restart.

Achievement: Consolation Prize in the AI4Life competition.

T2/2026 - T4/2026

GuideTar – Smart Guitar Learning Application

github.com/L1m-NguyenHai/GuideTar

- **Tech Stack:** Flutter, Dart, Python, FastAPI, Supabase
- **ML/AI:** madmom model + CNN-LSTM for chord recognition
- Developed a Flutter-based guitar learning app with chord catalog, lyrics/chord display, and song playback features.
- Implemented an AI-powered chord recognition pipeline using a CNN-LSTM model and madmom to detect beats and align chord predictions from MP3 uploads or YouTube URLs.

CERTIFICATIONS

TOEIC Certificate – 890/990

Issued: 2024

ADDITIONAL INFORMATION

- Available for full-time internship
- Open to Software Engineering, Tester, Backend, Frontend, Automation, and AI-related tasks
- Quick learner, adaptable, and able to work well in a team
